

HIVE Foundation

Helping the Infected and the Vulnerable Embrace life

SINCE 2005

ACTIVITY REPORT 2017-2018

ABOUT US

HIVE Foundation was inaugurated on 17th August 2005, to elevate the living of underprivileged, infected, destitute and vulnerable. We cater our services under indoor and outdoor Mission

INDOOR MISSION:

We had 2 shelter homes under this mission; HIVE Cornerstone shelter and HIVE Blossoms

HIVE Cornerstone shelter

"Come be blessed and be a blessing to others"

This project was started on 2005, to exclusively meet the needs of HIV +ve ladies who

face severe rejection from their society, family and by themselves.

We admit such women in our shelter home and provide them with nutritious food, clothing, shelter and medication.

After taking care of their immediate needs, we pay attention to their emotional deficit. We have special counseling time for every inmate, where we try to boost their mind and spirit and unveil their importance in our community.

We stir up awareness on healthy life style, treatment adherence and ways to combat stigma and discrimination. Job-oriented training are provided which in turn helps them to lead an independent life. We also promote meditation.

Enhancing leadership quality, collaboration and team spirit .we liberate them in to the society to help other HIV +ves who are downtrodden as they once were. This participatory approach is showing great results in elevating the living standards of HIV infected.

HIVE Blossoms

"Spread the fragrance"

This shelter home was initiated on 2006, to enhance the life style of children who are orphans, down-trodden, and HIV -ve of HIV +ve parents. Such kids are provide with not just food, clothes, shelter, but keen attention is paid on augmenting physical health , providing quality enriched education, fortifying general and academic knowledge, paving platform for their talents, encouraging co-curricular activities, taking them on tours and excursions, providing homely atmosphere. Our aim is to create a one big family where children could find security and know that they are loved and valued.

SINCE 2005

ACTIVITY REPORT 2017-2018

OUTDOOR MISSION:

HIVE Manna Project

"Feed the needy"

HIV +ves have very low job opportunities. Issues like stigma and discriminates hinders them from making their living of their own. Statistically, People living with HIV/AIDS are under "below paucity line" in India. They eventually die, not because of the infection but because of starvation and lack of nutrition. It is an unacceptable intolerable truth.

HIVE Foundation pays an ardent interest in these communities. Once a month, destitute people living with HIV/AIDS gather at our office. We train them to lead a healthy life style, provide medical counseling and medications. We pay for their travel expense and provide them with lunch and/or dinner. We also provide them with nutritious food provisions needed for a month.

We follow them up and provide educational support to their kids if needed. Currently 70 people are being benefited from this support group meeting.

Other field Missions

Humanitarian and public-oriented services are being rendered since 2005. These services includes conducting free medical camp & dental camp, hospital visiting (providing support, food and counseling to patients), support group meeting to HIV +ve patients, initiating & conducting self-help groups for women in their locality,

providing job-oriented trainings. We also conduct awareness program among: rural men & women, schools, drug addicts, HIV affected and tribal communities. We cover a wide range of topics, on general and social aspects of healthy lifestyle communicable diseases and its preventive strategies, moral values and building spiritual relationship.

We are also currently supporting few children by financing their educational needs. We aspire to serve more.

SINCE 2005

ACTIVITY REPORT 2017-2018

Highlights of Mission 2017

Slum adoption:

Bharathi nagar, a rural area in India, consist of vast population which lives under 'below poverty line'. It's a slum with high prevalence of illiteracy rate, low socioeconomic status and poor infrastructure. As of November 2016, HIVE Foundation collected the field data to understand and analyze the needs and the demands of this vulnerable community; furthermore interventions were strategically planned interventions to serve this community. As of January 2017 first we rented a community center at Bharathi nagar.

Free education and tuition to poor children; job-oriented trainings to women; ladies self-help groups

to communicate and enhance practical problem solving skills; trainings on healthy upbringing of children, scripture class to slum kids (every Sunday), and prayer groups are rendered to this community in the past year. Our immediate vision is to establish a church in this area. The community center is open for all to come in & register. First preferences are given to those who are in desperate need.

Furthermore, house visiting and area analysis are being carried on to effectively serve the community.

Outreach programs:

Free medical camp and dental camp were conducted at major slum areas of Chennai. Support group meetings of HIV +ves were conducted once every month. This Christmas, we gifted sarees and dresses to all our support group meeting participants. Financial support was given to HIV +ve parents towards the education of their children.

VISION 2018

The shelter homes for children and HIV +ve ladies were unfortunately shutdown on August 2013, due to intense financial scarcity, lack of funds on regular basis and new governmental regulations that insisted on having owned private space with several amenities. Having no other way out, we temporarily admitted our children in other orphanages. Few of our children are still being supported towards their education and living.

Our pressing God given vision is to re-open the shelter home for destitute/ orphan children, this June 2018. We are in the process of arranging the necessary governmental documents for this shelter-home and are looking for funds on regular basis.

We have much more plans and visions for the year 2018-2019. Please send your contact information to hivefoundation2005@gmail.com to be posted.

You can support us by being prayer partners, financial partners, volunteers and counselors in our philanthropic visions.
